Summary

Staff Web Developer / Full-Stack Engineer with 20 years building scalable, high-performance web platforms. Deep expertise in modern JavaScript ecosystems (React, Next.js, TypeScript, Node.js) and backend systems, combined with recent leadership in AI-driven development: building production AI agents, prompt-enabled developer and end-user workflows, and integrations that allow front-end users to interact with code via natural language. Proven to drive measurable business outcomes (revenue uplift, reduced cycle time) and deliver 40–50% team efficiency gains and 50% faster development velocity through AI automation, schema-driven content generation, and MLOps-aligned deployment practices.

Core Skills

- **Frontend & Frameworks:** TypeScript, React, Next.js, SSR/SSG, component-driven architecture, Storybook
- **Backend & APIs:** Node.js, REST, GraphQL, microservices, API orchestration, schema design
- **AI & Automation:** AI agents, prompt engineering, LLM integration (OpenAI, Anthropic, Gemini), GitHub Copilot, LangChain-style orchestration, retrieval-augmented generation (RAG), vector DBs, MLOps fundamentals, pipeline automation
- **CMS & Integrations:** Headless CMS (Sanity.io), MCP/connector integrations, content schemas, CMS API orchestration, Salesforce & Marketo integrations
- **DevOps & Tooling:** GitHub Actions, Docker, Vercel, CI/CD, observability, feature flags
- **Performance & SEO:** Core Web Vitals, technical SEO, analytics (GA4), A/B testing, accessibility (WCAG)

Professional Experience

Staff Frontend Engineer – Inbound Growth Marketing

Gladly | October 2021 – Present

- Led design and delivery of AI-enabled developer workflows and production AI agents that automate page generation, content population, and template scaffolding via schema-aware MCP connections to our headless CMS — enabling non-technical product and marketing users to create pages through natural-language prompts.
- Built orchestration layer and agent framework to access CMS schemas, validate content, and perform safe CRUD operations, reducing content build time and manual QA by 50% and increasing team efficiency by 40–50%.
- Integrated prompt-driven front-end experiences allowing end-users to trigger content/feature builds; implemented RAG and schema validation to ensure accuracy and governance across generated pages.
- Architected and shipped Next.js + TypeScript marketing platforms with SSR/SSG strategies, achieving 95+ Core Web Vitals and a 40% increase in organic traffic.
- Migrated enterprise from WordPress to Sanity.io headless CMS with MCP connectors and real-time preview; cut content deployment cycles by 60% and enabled programmatic content generation via AI tooling.
- Automated repetitive engineering tasks using LLM assistants (Copilot, Gemini CLI, internal agents), eliminating 1,000+ lines of boilerplate, accelerating feature delivery ~50%, and improving code consistency through automated linters and CI gates.

- Delivered structured data, schema markup, and technical SEO across 200+ pages yielding a 25% increase in search visibility; ran 25+ experiments via A/B testing to increase conversions by 18%.
- Established component library (40+ UI elements) with Figma-to-code automation, Storybook docs, and tokenized design system to support rapid composition and AI-assisted scaffolding.

Senior Web Developer

Pursuant | October 2016 - October 2021

- Engineered fundraising platforms for 11 non-profit clients, generating \$5M+ in annual donations through optimized donation flows and payment processing systems
- Developed 15+ custom websites and applications using React, PHP, jQuery, and MySQL, maintaining 99.9% uptime across responsive, cross-browser compatible platforms
- Integrated 6 payment gateways (Authorize.net, PayPal, Payflow Pro) processing 50K+ annual transactions and 8 email marketing platforms serving 500K+ subscribers
- Partnered with creative, analytics, and strategy teams to execute 40+ integrated campaigns, achieving average engagement rates 30% above industry benchmarks

Chief Digital Officer (Contractor)

Corridor Business Journal | January 2012 - January 2024

- Directed all technical operations for regional business publication, managing IT infrastructure, web development, and programmatic advertising generating \$200K+ annual revenue
- Optimized custom WordPress platform with DFP/Google AdSense integration, increasing ad revenue by 45% through strategic placement and performance tuning
- Expanded multimedia capabilities by implementing video galleries and social media integration, growing monthly page views by 60% to 150K+

Web Developer

The Gazette Company | January 2014 - January 2015

- Spearheaded frontend development for high-traffic news websites serving 500K+ monthly users, delivering responsive experiences across 10+ device types
- Engineered real-time interactive features including live sports scoreboards, GPS-tracked reporter updates, and dynamic weather widgets, increasing user engagement by 35%
- Integrated Saxotech CRM platform using JSONP for cross-domain data exchange, enabling seamless content syndication across 3 regional properties

Senior Web Developer

GoDaddy.com | January 2007 - January 2012

- Redesigned 6 product interfaces under aggressive timelines, achieving average +21.3% revenue increase (\$73K incremental), +5% order volume (+192 orders), and +15.9% average order value (+\$14.09) within 3 weeks of deployment
- Served as lead developer for GoDaddy Marketplace, building collaborative eCommerce platform with interactive UI components and social integration
- Developed customer-facing product management interfaces supporting 15+ browsers using ASP.NET, C#, jQuery, and SQL Server
- Led development of WHOIS search interfaces with real-time data delivery from registrar/registry services

Early Career Experience

- **Quilogy** - Consultant (2005-2007): Led .NET development projects and MOSS 2007 implementations for multiple enterprise clients
- **University of Iowa Hospitals and Clinics** - Application Support Manager (2005-2007): Managed 5-person team supporting 2,500+ users, implemented SharePoint and .NET clinical applications

Education

University of Iowa | BBA: Management Information Systems, Health & Human Physiology
Minor: Computer Science, Fine Arts | Graduated 2002
